To Whom It May Concern:

It is my sincere pleasure to write this letter of recommendation on behalf of Dr. LaTouna Mourad for licensure in Oman. She is highly qualified with her clinical training and experience, along with possessing a genuine desire to help patients in the most thoughtful, compassionate way possible.

Dr. Mourad's education includes graduating at the top of her medical school class in 2003 from Cairo University in Egypt. She completed subsequent training at the most prestigious obstetrics/gynecology program in Cairo, GLAA Hospital.

With a desire to obtain expert skills in assistive reproductive technologies, Dr. Mourad completed a fellowship from 2006 to 2009 at The Egyptian-ET Center. As the first IVF Center in the Middle East, The Egyptian IVF-ET Center has the most prestigious reputation in the Middle East and internationally as well. Over 7000 IVF cycles are performed annually, which allowed Dr. Mourad to develop a significant skill set in the technique. Dr. Mourad was extensively trained in IVF, ICSI, IUI, Ovulation Induction, Embryo Transfer – essentially all aspects of effective ART.

After her fellowship, Dr. Mourad worked as an Infertility Senior Specialist at Dar Al-Teb in Cairo for four years. She participated in ART for hundreds of patients, as they absolutely loved her there.

I met Dr. Mourad through colleagues due to her impeccable reputation, as she has been training with PRC since 2014. She participated in infertility treatment at all four of our Los Angeles metro locations, including new patient consultations along with therapy protocols.

Pacific Reproductive Center was the first center in the US to establish micro-array genetic testing (aCGH). We have published several papers in the topic, and PRC is widely considered as a pioneer in the technique which allows prospective parents to gain vital information regarding potential chromosomal abnormalities. Dr. Mourad has spent a considerable amount of time in an accelerated training program becoming an expert in the aCGH treatment at our facilities.

We have a very busy practice with several locations in the Metro Los Angeles Area, and Dr. Mourad had absolutely no problem keeping up with our incredibly busy patient volume. She has also found time to pursue a Master's Degree in Clinical Embryology and Andrology through Eastern Virginia Medical School USA. She is on track to complete her thesis in the next year. The masters degree is considered the most prestigious and well respected degree in the USA and worldwide for infertility field.

I have noticed Dr. Mourad works extremely well with all levels of staff, colleagues and her bedside manner with patients is impressive. They love her! She treats each and every patient as if they are family, and

spends a considerable amount of time explaining treatments and answering questions in layman terms so the patients fully understand their options. Her energy and commitment to ART is contagious – our staff has actually been much livelier when she is in the office as a result.

As a result of my personal interaction with Dr. LaTouna Mourad, it is without any reservation that I recommend her highly for licensure within Oman. Her expertise, compassion and personal character will be an immense attribute to the PRC expansion into Oman.

Her skill set in all aspects of fertility, including micro-array testing, is badly needed in the Middle East and will produce the same exceptional success rates that we are seeing in the US facilities. I guarantee that she will improve the field of ART tremendously in the region.

And upon all of this during her tenure at Dar Al-Teb, she started a side career as a television presenter for the El Mehwar Television Network. On the daily program, Dr. Mourad as an anchor presented daily medical news and interviewed high profile physicians in many specialties throughout Egypt. For four straight years Dr. Mourad found the time not only to excel in her Fellowship, but also do an amazing job on the television program.

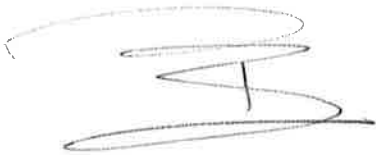

In the last year she has been invited by the TV station Alhurrah to comment on a cutting edge fertility treatment on the Alhurrah Alyoum program..

As outlined above Dr. Mourad is highly qualified as a fertility doctor, along with being highly respected by patients she treats at Pacific Reproductive Center. Since joining PRC Dr. Mourad quickly became one of the most requested physicians at PRC Fertility known for compassionate bedside manner and holistic approach to medicine.

In brief, Dr. Mourad will be a strong force in the fertility field of the Gulf and Oman area.

Thank you for your consideration. Please feel free to contact me at any time should you need additional information.

Sincerely,

Rifaat D. Salem, M.D., Ph.D.  
Executive Medical Director

## Addendum

October 15, 2018
